

Tech-A Ltd

Engineering Consultancy

Professional & Experienced Engineers

Benefit from our broad range of technical expertise and experience to solve your engineering design problems. We provide dependable and reliable engineering design services from preliminary plant layouts through to final manufacturing drawings.

Bulk Materials Handling Specialists

Resolve your materials handling requirements and problems with our technical assistance. We provide complete solutions to your bulk transportation requirements including:

- Material flow and overall system analysis
- Equipment sizing and selection
- Plant layout design (2D and 3D)
- Terminal layouts and interface design
- Preparation of specifications and tenders
- Extensive experience in long distance conveying

Project Co-Ordination and Management

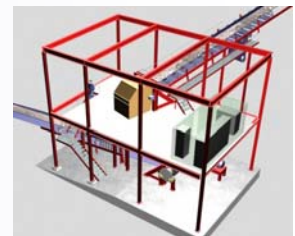

Be confident that your project will be co-ordinated efficiently and in a timely manner utilising our experience gained from working on many large and small multi discipline contracts. We are able to provide project planning, budgeting, specification preparation, equipment purchase co-ordination, etc.

Latest Technology

Make use of the high level of computer aided engineering expertise within our company to improve the quality and speed of the design process. We utilise the latest CAD and specialist engineering software and provide bespoke design programming. To help demonstrate any part or the complete project layout we offer 3D plant visualisation and animation.
